

Since the inception of the wisconsin "No Call" list a couple of years ago I have had almost no annoying/dinner interrupting sales calls. PLEASE don't allow the Consumer Banking Association to interfere with wisconsin's current "No Call" list - it works, don't fix it!. I am angry and discouraged at these seemingly constant attempts by various industries (lobbyists) to tamper with something that so many of the American people have said over and over that they want and that works well. Keep these vultures off my phone lines!
